VPA Supply Lists

In the 6th grade, students will be asked to use an established system of organization for their school supplies. Teachers will support students in setting up their supplies at the beginning of the year. This helps to provide structure and reduce confusion during a significant transition for this age group.

In the 7th grade, families and students will be more familiar with managing materials for 6 different classes and therefore will have more flexibility in how students choose to organize materials. The 7th grade team recommends multiple binders with two or three subjects organized into each and divided with binder tabs. These binders can be strategically organized based on the student’s schedule to allow for more efficient locker visits.

By 8th grade, most students and families have determined methods of material organization that work well. However, the 8th grade team requires a durable, spiral bound, 3-hole punched notebook for each class, aside from the fine arts. Latin and Math both recommend this notebook be a 3-subject notebook. These spiral bound notebooks may be used up throughout the year and need to be replaced. Additionally, the 8th grade team recommends folders dedicated to one or two courses to organize any handouts received in class.
